ABOUT GADWIN PRINTSCREEN  
=====

Gadwin PrintScreen lets you capture images from your computer screen. For example, you can capture the entire screen,

individual windows to use as an illustration in a manual or on a Web site.

Gadwin PrintScreen captures the contents of the screen with a single keystroke. The captured screen can then be sent to the printer, or saved to disk as a file in 6 different graphics file formats. Gadwin PrintScreen can capture the entire Windows screen, the active window, or a specified area, when the hot key is pressed. The hot key defaults to the PrintScreen key, but users may also define other keys to initiate a capture. Gadwin PrintScreen allows you to e-mail the captured images to recipients of your choice. Use Gadwin PrintScreen to save time and enhance your screen shots. Visit the company's Web site at <http://www.Gadwin.com>.

## SYSTEM REQUIREMENTS

=====

The program requires Microsoft R Windows 98/Me/2000/XP/Vista, or Windows NT 4.0 Sp6. If you are running any of these operating systems and have a Windows-compatible mouse or pointing device, your system has already met all the requirements necessary to run Gadwin PrintScreen. A full installation of product requires only 0.7 megabytes of hard drive space. If a graphics printer or fax is installed in Windows, it will work with Gadwin PrintScreen.

## WHAT IS NEW IN THIS VERSION?

=====

- Performance and memory usage has been improved;
- Image quality has been greatly improved for all graphics drivers;
- Updated language files (German, Swedish);

## SETUP

=====

### Installing Gadwin PrintScreen

-----

NOTE: Prior to installing the newest version of the Gadwin PrintScreen you must uninstall the old version!

To install Gadwin PrintScreen run the "Setup.exe" and follow the instructions. You'll need to select the target directory. To launch the program use "Start|Programs|Gadwin PrintScreen" menu.

## Uninstalling Gadwin PrintScreen

---

You can uninstall Gadwin PrintScreen by carrying out the following steps:

1. In Control Panel, double-click the Add/Remove Programs icon.
2. Click "Gadwin PrintScreen", and then click Add/Remove.
3. Follow the instructions on your screen.

OR:

1. Choose Uninstall from the Gadwin PrintScreen program group.

## MORE PRODUCTS

---

### Gadwin DiagramStudio

---

DiagramStudio 5 is a latest version of our drawing and diagramming program for Windows. Diagram Studio allows you to draw flowcharts, organizational charts, technical drawings, business presentations and annotations. This program's ease of use makes it particularly suitable for users who need to create professional-quality drawings quickly and easily. DiagramStudio can save you a lot of time when making a chart, because it links symbols together automatically when they are moved and/or resized. You have full control over text, shape and line styles. Diagram Studio provides a fast track to smart, attractive illustrations. DiagramStudio can create diagrams with minimal effort. Drop in figures like rectangles, polygons, ellipses, and even clip-art, and then connect them with various types of lines or arrows to represent flows, control paths, or procedures. Choose your symbols from the built-in symbol templates, the symbol gallery, or add clip-art using any Windows metafile, bitmap, PNG, TIF, GIF, or JPEG graphic. Use simple lines to connect your symbols or use dashes, curves, arrows or complex combinations for any type of line you like. And of course you can add text labels anywhere on your diagram.

### Gadwin GeForms

---

Gadwin GeForms is software that can be used for creating a variety of personalized office stationeries and forms. Forms are an invaluable tool for collecting the information needed to run today's businesses, even in some households, and of course our many government agencies.

Of course, we will not eliminate paper forms in the near future, but electronic forms enable the user to fill them out more effectively. And GeForms is the easiest, best way to create or fill electronic forms! The program provides sophisticated form design tools, which allow you to create forms from scratch or edit and enhance forms created from a template. GeForms also allows you to visually fill out a pre-printed form and print it. Take any paper form, scan it with GeForms. You've got an electronic form that you can fill out right on your computer screen!
